

Java/ Android Developer

Who I Am and What I Do.

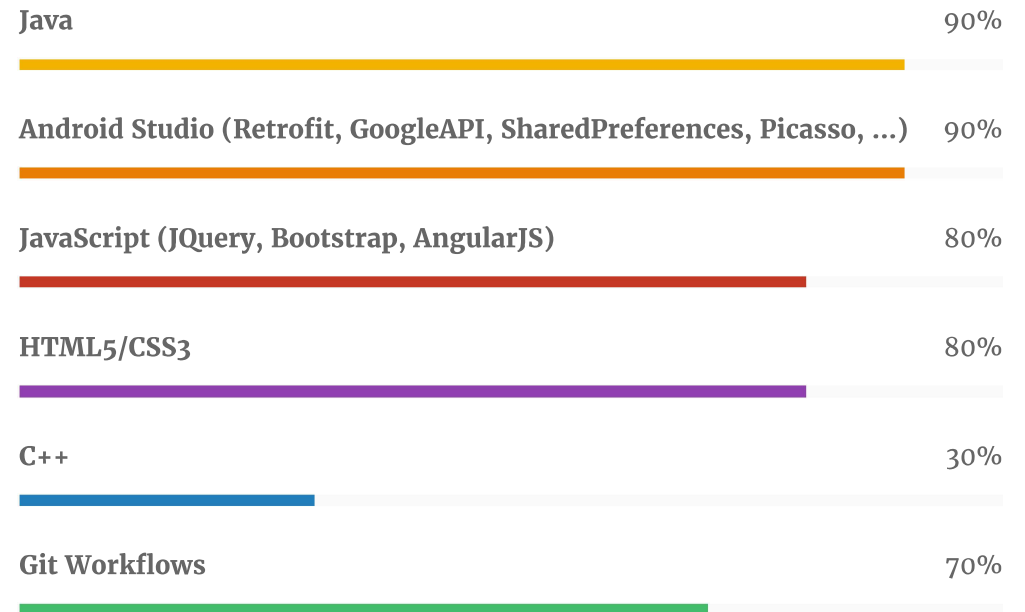

I'm Annika, and I'm a native android app developer using **Android Studio 2.0** and object-oriented **java**.

I studied **maths** and I'm very much into logic and structures.
Plus, I love my **languages**, apart from German 🇩🇪 and English 🇬🇧
I'm also fluent in French 🇫🇷 and Spanish 🇪🇸.

At university I learned some **C++**, after I started fiddling with **javascript** and **html/css**, then decided I wanted to create apps.
Check out my latest app below!

My dream for the next step is working in a bigger team, learning from people with tons of experience. For reference, please contact my co-worker Anja Wahl, who broke me in:
anja.wahl(at)codivo.de.

My Main Skills.

Work and Experience.

work in progress
Feb - current

Internship Android Development

I created an app that uses Picasso, SharedPreferences, Retrofit and the GoogleAPIClient. Besides, I learned to use git and learned about the workflow in a web/app agency.

2 years
2014-2016

HTML, CSS and JS

I played around with some smaller web applications and learned how to create websites.

4 years
2010-2014

Studied math and learned some C++

In my studies I was into amazing algebra and dazzling discrete mathematics, I enjoyed the abstract concepts and the algorithms.

Services

Native App Development

I want to build highly performant and beautiful apps from scratch in different technical and social environments. I'd love to work with Scrum!

Java Development

Being very much into objective programming, given the opportunity I want to develop and apply my java also in other contexts than mobile applications.

Web Applications

Though I strongly prefer developing native, I'm ready to program with Apache Cordova, PhoneGap and Kony, if called for.

Web Development

If it is of use, I would like to apply my knowledge of HTML5, CSS3 and Javascript, and the frameworks JQuery, Bootstrap and AngularJS.

Sample Projects

Restaurant Navigation App

In my internship I programmed a lightweight version of a lunch payment app.

Curriculum Vitae

2/2016 –
current

Internship at Codivo GmbH

I learned java and native android development.

10/2014 –
7/2015

MSc at the University of Vienna (without graduation)

I studied some more algebra and mathematical logic, then decided I wanted to get my hands dirty with some non-academic stuff.

10/2010 –
6/2014

BSc of Mathematics at the University of Bonn

I specialized in discrete mathematics and algebra. Average 2.0 (German) or 3.0 (GPA): 

10/2008 –
9/2010

BSc of Economics at the University of Bonn

I specialized in the field of micro economics and finance, and finished with an average of 1.6 (German system) or 3.3 (GPA). An extract from my thesis was published in the Bonn Economic Journal: 

10/2009 –
9/2014

Teaching Assistant

Almost through all my years at university I worked as a TA in the subjects of micro- and macro economics, finance, statistics, econometrics, and mathematics at the university of Bonn.
