

Annika Westphäling

About.

Hi, I'm Annika. German Annika, just want to appear international and classy.

Originally I studied **mathematics**, soon found my way over to programming. I love learning **new technologies**, and I am capable of quickly adapting to new work environments.

I'm passionate about **effective communication**: clarifying roles and expectation, learning and sharing skills, figuring out requirements and breaking them down into accomplishable steps.

With my quantitative background and my technical knowledge, **Machine Learning/Data Science** comes naturally as a next step, which is where I'm headed for now.

My Main Skills.

JavaScript	90%
NodeJS	80%
Angular/ngrx	90%
React/Saga	80%
Java	30%
Scrum/Project Management	60%

Sample Projects.

Altran S.A.S. & Co. KG / BMW

Database modeling and communication on Big Data management app (Java Springboot) in Autonomous Driving project, creating the UI with html and bootstrap

Genesis Mining

React/Saga frontend and NodeJS backend for blockchain query web app, orchestrating microservices, CI/CD with gitlab, create plugins and services with google apps script

Munich RE

Angular frontend and C# backend for database management app

Work and Experience.

Services.

(Mobile/Web) App Development

I like building shiny, fast, extendable frontends with React or Angular ...

Machine Learning

Proficient in and eager to learn more about Neural Nets, Statistics, Tensorflow, Python

Backend Development

... and establish database communication with NodeJS, C#, PHP or Java

Project management, Scrum

I enjoy filling out communication roles when desired and necessary (e.g. in small teams).
