

Software Developer

About.

Hi, I'm Annika. German Annika, just want to appear international and classy.

Originally I studied **mathematics**, soon found my way over to programming, first with **JS/Query**, then **frontend frameworks**, now also **backend development**. I love learning **new technologies**, and I am capable of quickly adapting to new work environments.

Team collaboration is a part of my job that I enjoy immensely. On the operational level (learning and sharing new skills) but then also process of finding the most effective way through a multitude of requirements, open questions, and challenges and breaking them down into accomplishable steps. I'm also passionate about figuring out how to improve team communication, address unattended frustration or help to clarify roles and expectations.

With my quantitative background and my technical knowledge, **Machine Learning/Data Science** comes naturally as a next step. So far, I could polish up my statistical skills and Python programming, and work with libraries such as Pandas, Numpy and Matplotlib.

My Main Skills.

Sample Projects.

Altran S.A.S. & Co. KG / BMW

Database management app (Java Springboot) in Big Data / Autonomous Driving project

Genesis Mining

Querying and aggregating blockchain data (Javascript)

Munich RE

Database management app (JS, C#)

Work and Experience.

current

04/2019 - current

3 months

01/2019 - 03/2019

1 year

12/2017 - 01/2019

1 year

01/2017 - 11/2017

1 year

02/2016 - 12/2016

10 months

10/2012 - 07/2013

3 years

10/2010 - 01/2014

5 years

10/2009 - 9/2014

2 years

04/2008 - 9/2010

●

App Development w/ Angular and C#

Munich RE big data project

●

Java Springboot Development

Working for Altran S.A.S. & Co. KG on a BMW autonomous driving project

●

React and NodeJS

Working for Genesis Mining on blockchain query tools

●

Ionic and Angular

Working for Mobile Software AG on hybrid apps
Work Sample

●

Several Projects

Codivo GmbH(Native Android Development),
OMMAX(Typo3)
for Mozaiq Operations GmbH (Cordova)
for CGI business and IT consulting on BMW's internal website (JS, MS Sharepoint)

●

C++

Coding for academic purposes(Universität Bonn) (mainly algebraic transformations and markov simulations)

●

BSc of Mathematics at the University of Bonn

average of 2.0 (German system) or 3.0 (GPA).

●

Teaching Assistant @Universität Bonn

mathematics, micro- and macro economics, finance, statistics, econometrics

●

BSc of Economics at the University of Bonn

average of 1.6 (German system) or 3.3 (GPA). Got published in the Bonn Economic Journal: 📄

Services.

(Mobile/Web) App Development

I like building shiny, fast, extendable frontends with React or Angular ...

Machine Learning

Proficient in and eager to learn more about Neural Nets, Statistics, Tensorflow, Python

Backend Development

... and establish database communication with NodeJS, C# or Java

Project management, Scrum

I enjoy filling out communication roles when desired and necessary (e.g. in small teams).

Annika Westphäling

Pestlozzstraße 46
80469 Munich / Germany
